

My Quixtar business has been a tremendous breakthrough for my life. As a college graduate, my expectations of success were not met when I received my first entry level position. Two and a half years later, my expectations of success continue to be unmet by traditional jobs because the income was just not there. I paid for college via student loans which left me in huge debt that was unrealistic to eliminate by working full time or even overtime at a job. I had to look for options for making extra money and after evaluating the Quixtar business opportunity it was the way to go. My business will eliminate all of my student loans in the next year. My business works perfectly for me around my schedule and I decide what I want to do when I want to do it. I do not have that freedom with traditional jobs. I registered in the Quixtar business after evaluating it for several months by doing research with the FTC and the BBB. I also studied the business team. It's unfortunate that traditional businesses do not have the honesty and integrity of this business team. I have seen more dishonesty in Social Service in my first years of establishing my occupation than I have in my life. Traditional businesses need to be scrutinized for false advertising when bringing new hires abroad. I have seen the failure of several social service agencies due to fraud. Louisiana is an at-will state and I have to protect myself by developing outside income so I will not go hungry or become homeless when the job market continues to fail and that is what I love about my Quixtar business.

When I sponsor others I tell them to do their due diligence. I explain to them that there is no rush in registering with a Quixtar business. Individuals I meet are made aware to check the FTC and the BBB. Why wouldn't any potential business owner do research before investing? I inform people that this is not a "get rich quick scheme" and work is required. I inform people that success is totally up to them and unfortunately people that I meet are so desperate to find a quick solution to their financial issues that they are not even willing to create a business, but there is a majority that is motivated and driven to see their success and are willing to put forth an effort. My prospects also understand that there is a registration fee of \$45.00 and an optional product pack that could be purchased. In the event that a prospect does not want to pursue a Quixtar business, it is understood that there is a money back guarantee because they have freedom of choice.

Prospects have the freedom of choice to make their own decisions. I do not agree with a seven day waiting period during and after registration. A waiting period will hurt my business and theirs tremendously. Jobs have restrictions! Independent business owners, hence the word, independent, want to be able to make their own decisions without restrictions that will in turn affect the income of their business because regulations want them to incubate for seven days. Why would I want to hinder the growth of my business?

A great friend in college told me about the Quixtar business and I felt he was a very professional person in and outside of the community. My friend did not have to go in the phone book and show me names and numbers of IBOs to earn my trust. Releasing names, numbers, and income statements of business owners is a direct violation of privacy. I was told of the great business team and had the option of attending a local conference or seminar and as a matter of fact, that's all I needed. I did not need to see an income statement to believe that Quixtar would actually work. I understood that life has risks

and undoubtedly every decision that I make is a risk in one form or another. As a motivated Independent Business Owner I was capable of making this business work for me because I understood that this was not a “get rich quick scheme.” My business is profitable and has expanded across the U.S.

I love to tell people I meet how much Quixtar has made a difference in my life, including future goals. I do not show people my Quixtar checks and frankly they don’t show me their employment checks either. I don’t ask a prospect how much they pay in taxes, health insurance, or the net worth of their home because that is their private financial matters. I don’t need to know the pending lawsuits that they may have against people in the community because those are private business matters. This Quixtar business is an optional way to make some additional income and that is as simple as it gets. I am leveraging my personal time throughout the day so I can have the funds to pay off debt and retire one day without depending on Social Security. I get a letter every year stating how much money I will get when I retire with my current wages and it saddens me that I have worked so hard and if I continue on the traditional corporate job path I will probably be still in debt and living with family trying to make ends meet. I want lifestyle and that’s what my Quixtar business will continue to create for me and my future generation.
